

Hi all,

As the saying goes, the best laid plans of mice and men... More importantly, Rob's horse appears to be on the mend and Robbin's animal will probably be on a permanent diet. My understanding is that not everyone got the word that it had been canceled but just consider this, that BLM wire certainly isn't going anywhere!

Summer is finally here! The weatherman says there will be hot days followed by cool days followed by hot days! So what's new?

Hope you all took a look at the National Trails Day - Steck Park Trash Pickup pictures and read Laurie's story! Thanks to Laurie, Lou Ann, Janine, Nancy, Bob & Rob for all their efforts. I grew up in Weiser and our family often traveled along the river looking for geodes, jasper, petrified wood and such and I have fond memories of boating and fishing with the family in that area. Laurie, you are to be commended for going back, collecting and disposing of the trash...and most of all for facing down that open range cow!

Terry and Gail MacDonald were the only ones (so I've been told) who attended the Owyhee Initiative fence removal project with the BLM. Many thanks to them for their work and sorry they didn't get the word about it being canceled. There will be something extra in their paychecks, I'm sure.

Lot of summer activities coming up to be discussed at the meeting along with the usual business items. Be sure to join us at La Costa to hear all the latest news. Hope to see you there!

Kay Ryan, President
